

Author:

Mr. E.A.Anasly Senerath is the author of above books and already who retired from the service after finishing his 23 years period, as an instructor in Sri Lanka Technical Education Service.

When retired from the service, he was working at Technical College – Homagama as the instructor of Electrical and previously worked at Technical College – Ratnapura as the head of the engineering courses.

These books were written in Sinhala medium for Sir Lankan students who betake studying **Engineering Technician** and **Engineering Craft** programs in Electrical related fields.

Mr. Senerath gained more practical & theoretical experience from training programs of NITE-SL of Sri Lanka and foreign experience from Ultimo Campus of Sydney Institute in Australia. Before joining the technical education service, he worked at Ceylon Government Railway (CGR) and Maharaja Group in his relevant technical field and he is a past student of NCT.

Book 1: Electrical Power Generation and applications.

Content **Price: Rs.250.00**

1. Electrical Power Generation & Distribution.
2. Basic Theory of AC Generators.
3. Electrical Power Generation.
4. Turbines.
5. Additional Generator Machines.
6. Electric Motors. (DC Motors, AC single phase motors, AC 3 phase motors, Universal motors)

Book 2: Electrical Machines and applications.

Content **Price: Rs.350.00**

1. Transformers.
2. On Load Tap Changer.
3. Rectification Circuit.
4. DC Machines.
5. Motor Windings.
6. Basic Theory of AC Generators.
7. Electrical Power Distribution system/order in Sri Lanka.
8. Centrifugal switch.
9. 3 phase Induction Motor.
10. Stepper Motors.
11. Logic Gates & Truth Tables.
